

Press Release

Continental Diesel with Chinese Manuals

Zhuhai (China), 14 November 2014—Technify Motors GmbH, a subsidiary of Continental Motors Group Ltd, an AVIC International Holding Corporation company, announced today that its operation and maintenance manuals for the CD-100 diesel engine series are now available in Chinese language to improve service in this emerging market.

“We are proud to publish our manuals for the diesel (jet-fuel) piston engines CD-135 and CD-155 in Chinese language now. Being active for over ten years on the Chinese flight training fleet market and initiating the offer of our retrofit kits for existing aircraft on the new and fast developing Chinese GA market, this marks a clear commitment to our first class service concept”, said Markus Steinberg, DO and Accountable Manager of Technify Motors GmbH. “Needless to say, receiving operating and maintenance instructions in your mother tongue also means increased safety and comfort”, he added.

“To expand the Asia-Pacific market, especially the China market, excellent service is crucial. First the establishment of Continental Motors Beijing branch and the launch of the warehouse have improved the delivery of Continental Motors engine spare parts and optimized the after-sale services in China market. Now we can offer these most convenient manuals in Chinese”, said Tian Shan, President of Continental Motors Beijing. “The new manuals will speed up maintenance and training processes, saving time for customers. It marks that Continental Motors is expanding its aviation industry chain to China”, she emphasized.

###
